

List Of Tables and Figures

Tables

Table	Page
1. Mean Pollutant Concentration (mg/L).....	11
2. Extent of Genetic Uniformity in Selected Crops.....	72
3. Reduction of Diversity in Fruits and Vegetables, 1903 to 1983.....	73
4. Past Crop Failures Due to Genetic Uniformity.....	74
5. Effects of Surface Residue Cover on Runoff and Soil Loss.....	85
6. Selected Estimates of Benefits from Water Pollution Control.....	86
7. Extent that urban and suburban respondents were “concerned that agricultural pesticides or livestock manure may contaminate drinking water in your community”.....	133
8. Extent that urban and suburban respondents valued farms or ranches as habitats for wildlife like pheasants, wild ducks, and other animals.....	134
9. Extent of conservation activity on surveyed owners’ land.....	135
10. Likely effectiveness of conservation incentive payments in leveraging new stewardship effort.....	137
11. Combined current and contingent conservation effort.....	139
12. The significance of the surveyed owners who currently apply or, contingent on incentives payments, say they will apply at least one conservation practice of the indicated type.....	140
13. How surveyed owners of urban-edge agricultural land evaluated seven kinds of governmental assistance.....	143

14. How surveyed owners evaluated two forms of governmental assistance with potential for environmental benefits compared to how they assessed two forms designed mainly to support owners' income from agriculture 145

Figures

Figure	Page
1. Sources of Identified Impairments to Surface-Water Quality	14
2. Loss of Topsoil in the USA	41
3. The Carbon Cycle	48
